## RESEARCH INTERESTS

Speech large language models and end-to-end simultaneous speech translation (SimulST / S2ST), with a focus on fine-grained streaming read/write policies, reinforcement-learning post-training of speech LLMs, and proactive full-duplex real-time interaction. First author of speech-translation papers at NeurIPS 2023, 2024, 2025 and 2026; recent end-to-end Chinese–English simultaneous interpretation system outperforms commercial real-time translation APIs from ByteDance, Alibaba, OpenAI and Google under a unified evaluation protocol.

## EDUCATION

**Shanghai Jiao Tong University** 2023 – present (expected Sept. 2028)
*Ph.D. in Computer Science and Technology, School of Computer Science*

**Shanghai Jiao Tong University** 2019 – 2023
*B.Eng. in Computer Science and Technology; Outstanding Graduate*

**Shanghai High School** 2016 – 2019
*Mathematics Specialty Class*

## RESEARCH & INDUSTRY EXPERIENCE

**Qwen Omni Team, Alibaba Group — Research Intern** Jan. 2026 – present

- Research on end-to-end simultaneous speech translation and proactive real-time interaction for omni-modal LLMs: small-chunk (400 ms) streaming read/write policies, RL post-training with LLM-judge reward models, and unbounded-stream inference with full KV-cache reuse.
- Built an end-to-end Chinese–English simultaneous interpretation system and a unified speech-level evaluation protocol; benchmarked against ByteDance Seed LiveInterpret, Alibaba, OpenAI GPT and Google Gemini real-time APIs, achieving state-of-the-art quality–latency trade-offs.

**Honor Device Inc. — Research Intern** Jul. 2025 – Oct. 2025

- Key contributor to the successful launch of Honor's on-device speech large model.

**Microsoft Research Asia — Research Intern** Nov. 2022 – Mar. 2024

- End-to-end speech-to-text and speech-to-speech translation with composite speech-language models (ComSL, TransVIP), leading to two first-author NeurIPS papers.

## PATENTS

- 一种基于专家路由门限的高效同声传译方法 (An Efficient Simultaneous Interpretation Method Based on Expert-Routing Thresholds). Chinese invention patent, application no. CN202510940032.8, publication no. CN120766657A, filed Jul. 2025; published, under substantive examination. Inventors: Y. Qian, **C. Le**.
- 一种多语言语音翻译模型、训练方法及推理方法 (A Multilingual Speech Translation Model, Training Method and Inference Method). Chinese invention patent, application no. CN202510985843.X, publication no. CN120808755A, filed Jul. 2025; published, under substantive examination. Inventors: Y. Qian, **C. Le**.

## HONORS & AWARDS

- 2025 Zhao Zhu Mulan Doctoral Scholarship, Shanghai Jiao Tong University
- 2023 Outstanding Graduate of Shanghai Jiao Tong University
- 2022 Liu Yongling Special Scholarship
- 2021 Second Prize (Shanghai Division), National Undergraduate Mathematical Modeling Contest
- 2021 Silver Prize, National Undergraduate Algorithm Design and Programming Challenge
- 2020 First Prize, National College Student Innovation and Entrepreneurship Competition

## SKILLS

Speech LLMs (Qwen-Omni family), streaming SimulST/S2ST system design, RL post-training (GRPO / PPO / actor-critic, on-policy distillation), large-scale training (PyTorch, PyTorch Lightning, LoRA, multi-GPU), high-throughput inference (vLLM), TTS and voice cloning, speech-translation evaluation (XCOMET, MetricX, LAAL / YAAL).
